

ORANGE RENEWABLE POWER TRIPLES WIND CAPACITY IN LAST 9 MONTHS

Commissions 120 MW at Mamatkheda (Madhya Pradesh) and Dalot & Devgarh (Rajasthan)

Delhi, 21st April 2015: Orange Renewable Power, a 100% subsidiary of AT Holdings Pte Ltd, Singapore, has tripled its wind capacity with the commissioning of 120 MW in the states of Madhya Pradesh and Rajasthan. Orange commissioned 97.5MW at its Mamatkheda site in Madhya Pradesh and another 22.5 MW at Dalot & Devgarh in Rajasthan, bringing its total wind capacity to 179 MW with an additional 400 MW under various stages of execution.

Speaking on the project Mr. Hemant Tikoo, Chairman – Orange and Experion Group, said, “This is a key milestone in our continued endeavor to deliver optimal energy solutions. We aim to contribute towards providing end-to-end cleaner renewable energy sources through significant investments in the sector”

The Mamatkheda project is one of the largest single location wind power projects to be self-developed by an Indian Independent Power Producer (IPP). With its commissioning, the Group has joined a select group of wind IPPs who have commissioned self-developed projects. Orange has partnered with Regen Powertech, a leading Wind Turbine OEM, in this venture and has installed its technologically superior gearless V87 machines at the site. The project has allowed Orange to showcase its project development, engineering and execution expertise, thus establishing its superior position to tap into India's vast wind and solar energy potential.

Orange Renewable Power, headquartered in New Delhi, is a renewable energy developer and operator of wind and solar projects.

Orange Renewable Power, India (www.orangepowergen.com)

A 100% subsidiary of AT Holdings Pte Ltd, Singapore. Orange Renewable Power is focused on developing, constructing and operating renewable energy projects in the field of biomass, small hydro, wind and solar.

AT Holdings Pte Ltd, Singapore (www.atcapital.com.sg)

Headquartered in Singapore, AT Capital Group was founded by Mr. Arvind Tiku. AT Capital Group has an asset portfolio worth approximately US\$2.5 billion. Its global portfolio includes investments in residential and commercial real estate, hospitality, natural resources, renewable energy, engineering and construction.
